SUMMARY

Aspiring full-stack web developer motivated by a semantic and agile approach to web development with interests in React development as well as learning new and emerging technologies. Comes from a background in fast-paced optical retail, developing skills in communication, teamwork and attention to detail. Completed a certificate in web development through USYD's Coding Bootcamp, developing skills with industry leading technologies such as MERN, Webpack, ORMs and ODMs, and has gained valuable experience in agile development and project management too.

Looking for opportunities to utilise and expand upon the skill set developed from current studies and from personal projects to build well designed and high quality web applications, but also to leverage interests in problem solving, collaboration and innovation.

TECHNICAL SKILLS

JavaScript ES7+, CSS3, HTML5, MERN, SQL, NoSQL, MongoDB, GraphQL, Apollo Client (React), JQuery, Bootstrap, Ant Design, Less CSS, Heroku, Netlify, Python, C

Giphy Guessing Game - Collaborative Project

Github: <https://github.com/wilgru/Group-F-Project-1-GIPHY-Guessing-Game>

Link: <https://wilgru.github.io/Group-F-Project-1-GIPHY-Guessing-Game/>

Summary: A fun, fast gif-based word guessing game built using GiphyAPI at its core.

Role: Developer

Tools: HTML, CSS, JavaScript, Skeleton, GiphyAPI

EXPERIENCE

Oscar Wylee - Customer Service | Dec 2020 - Present | Sydney, NSW

- Served 100+ customers a week with varying optic-related problems in a fast-paced retail environment.
- Boosted customer satisfaction through rapport building and friendly service, with a constant NPS score above an 8.
- Over 1¾ years experience using the following web applications:
 - **Adobe Magento 2** - Managed bookings, customers and orders.
 - **Google Sheets** - Analysed sales data and automated admin tasks using formulas and conditional formatting.

MediBand/FeverMates - All-rounder | Jan - July 2022 | Sydney, NSW

- Over 6 months experience using the following web applications:
 - **Shopify & Shopify Liquid** - Managed customers and orders. Used liquid to create highly customised and conditional email templates.
 - **Adobe Magento 2** - Managed customers, orders and products.
 - **MailChimp** - Managed customer mailing lists used for product updates and sales. Used handlebars to create customised email templates.
 - **Google Sheets** - Automated admin tasks using formulas and conditional formatting.
